Innovative Wireless Steam Bath Control

The K200i Freedom Control provides the ultimate steam bathing experience. The wireless remote control allows the bather to operate control functions from virtually anywhere within 50' of the steam shower. Imagine monitoring the temperature of your steam bath while reading the morning paper and brewing coffee in your kitchen. The K200i features a large 2.4" colored LCD display and universal icons to navigate settings.

Maintaining your system!

Between uses of the whirlpool or air system, residual water could remain in the piping system. This water may contain body oils, exfoliated skin, hair and soap residues which join with hard water deposits to create a bacteria buildup. Jet Fresh™ is formulated to break the bond of these deposits from the internal surfaces of pipes and fittings. Jet Fresh™ creates an environment that is unfavorable for growth of organisms, mold and fungi. By removing their food and lodging surfaces, the microbiological elements have no place to form a home.

It is recommended that customers use Jet Fresh™ once a month to thoroughly, yet safely, clean and maintain their systems. The formula deep cleans pipes where bacteria begins, yet no disassembly of pipes is required. Simply pour 2 oz. of Jet Fresh™ into the tub filled with clean or used bath water. Run the system for 15 seconds and let solution set in tub for 15 minutes. This time allows the solution to work into the piping system. Simply drain the tub and enjoy clean bathing! *Using Jet Fresh is easy and keeps your tub like new!*

You can order jet fresh on line at www.apexwhirlpoolbath.com

Your Whirlpool Heating Specialists

Forgot to order the bath heater with that tub? Bring it in and we can install it within **24 Hours** on most tubs

Starting at **\$175.00**
